nationale de
l'aviation civile

Présentation

Overview

The Advanced Master "Airport Management" prepares participants to the variety of challenges faced by the airport sector:

- * *the particularly important role played by airports within the air transport system,*
- * *the wide range of activities involved in airport operations,*
- * *the increasing importance of questions of security and environmental impact,*
- * *the competition between airports,*
- * *the economic and social issues in a such critical sector for national and international economies,*

All these factors call for highly skilled managers to run and develop every airport. This is the ambition of this programme.
