Présentation

Code RNCP : 36113

Capacity : 15 students max.

Spécificités

The LLM includes over 300 hours of teaching and seminars divided into 2 core modules and 4 specialized modules. All modules are mandatory to obtain the Master's degree. Courses are offered in sessions of four to six days, approximately once a month. Participants also have either to complete an internship or to conduct a group-work project under academic or professional supervision.

Evaluation :

Core module 1 : a 3-hour written exam (practical case) – 15 credits

Core module 2: a 3-hour written exam (practical case) – 15 credits

Specialized modules : one oral examination encompassing all 4 modules + at least one in-class assessment per module – 16 credits

Internship or group project : written report and defense – 14 credits

Objectifs

Flying has become common but for most human beings it remains an incredible achievement! In spite of the Covid-19 global crisis, the aviation sector has a bright future. This crisis is a real game-changer, legitimately questioning both players and models, but it is definitely not the end of the long-lasting adventure of aviation. Air traffic is gradually resuming and private entities as well as public institutions are committed to tackling aviation's greatest challenge: flying with zero carbon emissions. Aside from environmental concerns, regional and international regulation authorities, airlines, airport operators, aircraft manufacturers, OEM, MRO and groundhandling firms have to face a growing number of complex challenges and to deal with more legal and regulatory issues such as safety, security, export control, embargoes, data protection, competition, unmanned systems... In this context, the demand for qualified legal expertise is increasing.

The LLM International Aviation Law aims at offering strong expertise and appropriate solutions to aviation sector players. With more than 300 hours of face-to-face teaching, a set of comprehensive modules addressing the major current legal issues of this area, and many academic and industrial partnerships, this LLM stands first and unique worldwide and is designed both for graduate students and for top executives in these domains.

For half a century, Toulouse, France, has been home to major international aeronautic players (Airbus, ATR...) and the most renowned centre for education and research in the aerospace sector (ISAE-Supaero / ENAC). The University of Toulouse Capitole and its well-known European School of Law offers cutting-edge programs, fully taught in English.

The LLM brings together academic faculty from Toulouse Capitole University, international partner universities, engineering institutes, and industry-experienced speakers from major aviation related firms and institutions: Airbus, ATR, Thalès, Daher, ISAE-Supaero, law firms (Chevrier, Selene, JH, Hughes Hubbard Reed...) Goshawck, Flightright, ADP, Airfrance, Safran SEP... All taught courses, as well as assignments, exams, group-work are in English. Additional French as a Foreign Language classes may be organized on demand. Classes are organized to fit continuing education participants' schedules (one teaching week each month).

This one-year specialization (Master 2nd year) aims at offering strong expertise and appropriate solutions to aviation sector players. With over 300 hours of in-class teaching – a set of comprehensive modules addressing the major current issues in aviation law – and many academic and industrial partnerships, this Master is unique worldwide. It takes a strategic and interdisciplinary approach to the main legal challenges within this field and is designed both for graduate students and for top executives.

Admission

Conditions d'admission

Targeted public:

The LLM is open to applicants:

- holding a 1st year of a Master's degree (240 ECTS)
- holding a Bachelor's degree granted in 4 years (240 ECTS)
