Présentation

The **Master M2 parcours-type Corporate Finance** aims at providing students with the skills required to analyse and manage corporate finances.

The main areas of study include managing investments and risk, planning and managing financial strategies, managing interest and exchange rate exposures, and corporate accounting and audit.

On completion of these studies in corporate finance, students will have acquired a breadth of financial expertise including a good grasp of how markets operate, as well as a more specific understanding of banking, accounting, strategy, and IT.

Etablissements partenaires

This Master is a programme in partnership with Toulouse School of Management (TSM) and Toulouse School of Economics (TSE).

Objectifs

By the end of the Master in Finance, students will be able to:

- * Know basic institutional and regulatory framework of finance in organisations and markets;
- * Understand the conceptual foundations and analytical methods in finance;
- * Apply analytical methods in finance to solve practical problems encountered by corporations, financial institutions and markets;
- * Critically assess the drivers of contemporary financial issues;
- * Incorporate ethical dimension and implications for sustainability in financial decisions;
- * Communicate effectively in oral and written form;
- * Work in team;
- * Solve complex problems.

Students pursuing the track Corporate Finance will learn to:

- * apply financial analysis and corporate valuation methods;
- * plan and manage strategic financing;
- * identify and manage operational and financial risks.
