Capitole

## Présentation

 Code RNCP : 35913

**The Master in Finance and Information Technology (FIT) provides students with skills in both finance and financial IT.**

Financial technology, also known as "fintech", aims at proposing solutions to all actors involved in financial decisions, such as financial institutions, firms and single individuals using specialized IT tools.

The Master provides a rigorous preparation in all fields of Finance, namely corporate finance and market finance, together with a solid knowledge in IT support tools, such as business intelligence and blockchain. Through practical cases and projects, students develop complementary practical skills like problem solving, communication and business etiquette.

### Etablissements partenaires

This Master is a programme in partnership with Toulouse School of Management (TSM) and Toulouse School of Economics (TSE).

## Objectifs

### Students pursuing the track Finance and Information Technology will learn to:

- \* Analyze and exploit big data to extract information to take financial decisions;
- \* Implement and upgrade business processes which collect information to support company's decisions;
- \* Design and implement business intelligence systems applied to financial contexts.

## Admission

### Conditions d'admission

#### Prerequisites for all candidates:

- # Successful completion of 240 ECTS
  - # An English language test for non-English speakers (B2 required). *List of the English language certificates accepted [here](#).*
  - # Examination of candidate's application and possible interview
- Please note that candidates who have completed the TSM M1 in Finance are given priority.
