Présentation

The ISAE-SUPAERO Master of Science degree program is internationally renowned and highly regarded as an innovative program in science and technologies

Objectifs

The Master of Science in Aerospace Engineering is intended to educate graduate students in subjects relevant to the demanding challenges and needs of the industry.

Endowing students with skills in engineering science, technology and design as they relate to aeronautics and space, the MSc AE program is designed to be multi-disciplinary preparing future engineers to easily and efficiently work on aeronautical systems, space systems and their applications, with a focus on the complete life cycle of the system. The MSc AE program takes in a wide spectrum of knowledge, enabling students to tackle various aspects from design to operating products and systems either in research organization or in a aerospace company in a multinational environment.

Admission

Conditions d'admission

The applicants must hold the following degrees:

- **Bachelor's degree**, or the equivalent, in the following fields: mechanical engineering, mechatronics, aerospace, electronics, electrical systems, telecommunications, etc.
- **Or French licence** in Science and Engineering.

Students holding a degree in mathematics or physics may also apply.

A WIDE RANGE OF EXCITING FUTURE CAREER PROSPECTS AWAIT YOU

WIDE-RANGING JOB OPPORTUNITIES

Our graduates will work as technical experts, researchers and managers in the fast-expanding aerospace sector and key sectors of the economy, in Europe and all around the world.

CLOSE-UP ON THE CLASS OF 2024* Business areas

The Career Center at ISAE-SUPAERO

The Career Center provides support for students entering the workforce. Every year, companies receive more than 800 ISAE-SUPAERO students for internships and Master's theses.

Conferences, industrial visits, forums, recruitment workshops are organized by our Career Center.

A MULTIDISCIPLINARY CURRICULUM

FULLY TAUGHT IN ENGLISH - 4 SEMESTERS WITH 30 ECTS EACH

The first semester of the Master of Science in Aerospace Engineering program focuses on the common core curriculum, while the second semester offers a wide choice of electives. In the third semester, students choose one of the seven majors in the main areas of aeronautical and space systems design.

Students complete a master's thesis in the fourth semester
